High Speed Single Jersey Machine Perfect Elastomer Plating

4SP72
4SP90

power of innovation by

CANMARTEX

Single jersey machines with 4 tracks with two versions:

- 2.4 feeders/inch **HIGH QUALITY FABRICS** and
- 3 feeders/inch **HIGH PRODUCTION**

These models of machines can knit all possible structures in 4 needle track machines: single jersey, pique, 2- thread fleece, plating with or without elastomeric yarn...

Standard features:

- Solid frame with system of cylinder bearing submerged in an oil bath.
- Central and individual stitch length adjustment.
- Cylinder and needles supplied by GB.
- Supplied with 3 needle tracks, to knit: jersey, pique and 2-thread fleece.
- Exchange cam to Knit – tuck – miss
- Ceramic yarn carries.
- Positive feeders supplied by Memminger.
- Elastomeric plating equipment with MER.
- 500 mm fabric rolls.
- Fabric folding device.
- Martex aluminum tube side creel.
- Pulsonic 5.2 oiler.
- Control Navigator Memminger.
- Frequency controlled drive (AC) 5,5 Kw.

Optional features:

- Industrial frame for 800 and 1000 mm fabric rolls.
- Open width device.
- Up to 4 types of cylinder needles
- Electronic needle detector.

Under customer requirements, our I+D+i department will work to get the target exclusively to each demand.
